Standard Wire Connectors*

Connectors are color coded with spring inserts. Heat resistant (105°C) thermoplastic. Connectors are for copper to copper connections. Parts 6294 and 6296 can connect aluminum to aluminum and copper to aluminum (dry locations only).

Winged Wire Connectors*

Durable thermoplastic material. Flame retardant, abrasion resistant, non porous, and non corrosive. Expandable spring grips into the wire and adjusts itself to the wire size and shape so pre twisting is unnecessary. Even during temperature changes, they resist vibrations and retain holding power. Parts 8284 and 8286 are for use with copper to copper, aluminum to aluminum, and copper to aluminum (dry locations only).
