

EXTEND IT.. FIND IT.. GRAB IT!

Klenk's Telescoping Flashlight/Magnetic Pickup

Gives you super illumination where you need it and pickup power when you need it!

- Magnetic pickup tool also functions as a flashlight for illuminating hard to reach areas -- crawl spaces, around furnaces and water heaters, and even under the hood!
- Machined aluminum flashlight has knurled surface for a secure grip and a hex head to keep it from rolling off your work table.
- Flashlight extends out to 20", and the upper part of the shaft has a 2" long flexible portion that gets into places few other pickup tools can!
- High-power magnet on the flashlight end has 2 lbs. of pickup power!
- Use the other high-power magnet on the base for mounting the flashlight to a metal surface for a hands-free work light!
- The flashlight/pickup collapses to a conveniently portable 7½".
