### CF - Cable Feeding Tool (Standard with Model 88)

Helps work cable around tight bends.

# Cables

## **Cutter Leader**

Adds flexibility to front of Proflex cables.

### Flexicore® Cable

G-CI

### **Wire Rope Center Construction**

Heavy-gauge wire coiled tightly around 49-strand aircraft-type wire rope and heat treated. Has unequalled strength and the right amount of flexibility. So tough it carries a one-year warranty against defect or breakage. Flexicore Patent Nos. 2,244,735 and 2,849,870

General Flexicore® Cable with Male and Female Connector

### **Sectional Cables**

Sections for Model 88 and Rodrunner come in the all-purpose Flexichain which has a chain center, a stiffer Proflex which has a spring center, and a hollow style. Choose from three coupling styles. They snap together in a second and are taken apart guickly with a spanner wrench or uncoupling key. With the more recently developed "G" connector, no torque is put on the locking pin when running in reverse, making it a durable coupling.
