Affordable.  
Professional.

T701i

Basic

Single Stage  
Residential  
1 Heat, 1 Cool  
Programmable Through App

T855i

Advanced

Universal  
Residential / Light Commercial  
4 Heat, 2 Cool Heat Pump  
2 Heat, 2 Cool Conventional  
7 Day - 5/1/1 - 5/2 or Non-Programmable

Wi-Fi Optional

All thermostats are fully functional without Internet access. This is important for new construction or those installs where you don't have access to the network password. Pro1 will help the homeowner get it connected when they get home.

Universal Subbase

Upgrading is fast and easy from existing Pro1 thermostats. No additional wiring necessary as long as the C wire is connected. Just pop off the existing thermostat and replace it with a new T701i or T855i.

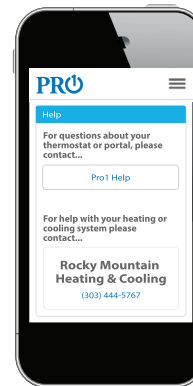

Active Alerts

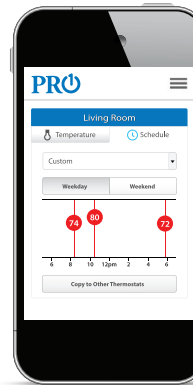

Homeowners receive alerts from anywhere on their smart phone and email. High and low temperature limits, connection loss, and irregular run times are just some of the notifications available.

Why choose Pro1?

Our customized, innovative, efficient products are chosen by thousands of heating and cooling professionals. We bring the same level of performance and simplicity to the connected thermostat market with our new line of Wi-Fi thermostats. The T701i is perfect for the everyday homeowner who wants to keep it simple. The T855i is great for all of those advanced jobs that require advanced features, multiple stages or commercial settings.

Private Label App

Simple Scheduling

Private Label

Pro1 offers private labeling free of charge on the thermostat as well as on the homeowner app. Whether they are at home or on vacation you will get a call if something goes wrong.
