PVC & CPVC GATE VALVES

Performance Engineered

This solid, proven design is well suited for a variety of chemical, industrial and irrigation applications. Spears® Gate Valves are feature-packed with multiple end connector options. Individual special features are found in each size range 1/2” through 2”, 2-1/2” & 3” and in the full featured Heavy Industrial 4” valve.

See Spears® Plug Gate Valves for 6” & 8” size.

Heavy Bodied PVC or CPVC
Computer engineered, heavy bodied PVC or CPVC construction adds extra strength with superior chemical and corrosion resistance.

Non-rising Stem
Non-rising stem reduces clearance requirements and incorporates an O-ring stem seal which eliminates the need to retighten the stem nut, as required with traditional stem packing in order to stop leaks.

Specially Designed Sealing Surface
Specially designed sealing surface and tapered wedge promote positive sealing and smooth operation with minimal tightening.

Exclusive Strain-Equalizing Thread
Special strain-equalizing thread is used to couple the stem and wedge. This exclusive feature reduces the chance of stripping wedge threads in the event of accidental over tightening.

High Impact Polypropylene Handle
Wheel style, high impact polypropylene handle is sized for a solid grip to effect positive opening and closing.

Fully Repairable In-Line
Replaceable components are accessible without removing valve from line. Convenient O-ring replacement kits provide for easy ordering, servicing and extended valve life.

Vacuum Service
Spears® Gate Valves are tested at 26 in. Hg vacuum for one hour with less than 1 in. Hg loss.

1/2" through 2" Heavy Duty Gate Valves
• Available with socket, threaded or flanged end connectors.
• Also available in 20mm through 63mm metric sockets or 1/2” through 2” BSP threads.
• Buna-N, EPDM or FKM O-rings.
• 200 psi Maximum Internal Pressure Rating @ 73°F.
• NSF® Certified for potable water service.

2-1/2”* & 3” Heavy Duty Gate Valves
• Available with either socket, special reinforced (SR) threaded or flanged end connectors.
• Buna-N, EPDM or FKM O-rings.
• 150 psi Maximum Internal Pressure Rating @ 73°F.
• Optional 2” Square or T-Style Operator Nuts available.
• Manufactured from NSF® Certified materials.

4” Heavy Industrial Gate Valves
• Designed for the most demanding of industrial applications with heavy, type 316 stainless steel exterior bonnet.
• Special Quick-View stem position indicator shows gate position at a glance.
• Available with either socket, special reinforced (SR) threaded or flanged end connectors.
• Buna-N, EPDM or FKM O-rings.
• 235 psi Maximum Internal Pressure Rating @ 73°F.
• Optional 2” Square or T-Style Operator Nuts available.
• Manufactured from NSF® Certified materials.

Sample Engineering Specifications
All thermoplastic gate valves shall be constructed from PVC Type I Cell Classification 12454 or CPVC Type IV Cell Classification 29447. All O-rings shall be Buna-N, EPDM or FKM. All valves shall have non-rising stem and Polypropylene handle. All gate valve wedges shall have Strain-Equalizing threads. PVC valves shall have Polypropylene Wedge and CPVC valves shall have CPVC Wedge. All valve components shall be replaceable. All 1/2” through 2” valves shall be pressure rated at 200 psi, all 2-1/2” through 3” and all flanged valves shall be pressure rated at 150 psi, and all 4” valves shall be pressure rated at 235 psi for water at 73°F, as manufactured by Spears® Manufacturing Company.

1: For CPVC valves, add the letter “C” to the part numbers (e.g., 2031-005 C).
2: Flanged end connectors have a Maximum Internal Pressure Rating of 150 psi @ 73°F.
3: Outlet sized with bushing.
