

DIRECTIONS:

- 1. Read entire label and warnings on side panel before use.
- 2. Disconnect all power before working on equipment.
- 3. Protect surrounding area from over-spray.
- 4. Dilute CONDENSER COIL CLEANER with water according to dilution rates below.
- 5. Always spray downwind with a coarse spray to avoid misting. Spray between fins using horizontal motion, working from the bottom up.
- 6. Wait 3 to 4 minutes until foam begins to subside and rinse thoroughly with large amounts of water.

Note: Product effectiveness is enhanced by high ambient air temperature.

DILUTION RATES:

Heavy duty cleaning	2 to 3 parts water
Moderate duty cleaning	4 to 6 parts water
Light duty cleaning	up to 20 parts water

NON-WARRANTY: All statements and recommendations herein are based on the best information available and are believed to be reliable. However, no warranty, either expressed or implied, including merchantability and fitness for purpose, is made concerning the application or use of this product since the customer's use cannot be controlled. Statements concerning the use of this product should not be construed as recommendations, suggestions or inducements to use this product in violation of any applicable laws or regulations.
