

Tube Cleaning Brushes

Fitting Cleaning Brushes

available with wire or plastic handle

Fitting Cleaning Brushes clean the inside of fittings faster. For plumbing or refrigeration applications. Carbon steel brush provides long wear; fast and easy to use; prepares joints better for solder. Ideal for battery terminal cleaning.

4-in-1 Fitting Tool

1/2" & 3/4" I.D., 5/8" & 7/8" O.D.—a must for any tool box!

The 4-in-1 Tool is a combination brush that cleans and prepares joints for solder. Removes dirt and debris from connecting parts; use Harvey's Abrasive Sandcloth to polish end of tubing after cleaning away corrosion with brush. Joints to be soldered must be free of any grease, grime, corrosion, hand prints or contamination in order to form a seal. Ideal battery post and terminal cleaner. Saves space, combines four tools into one.

Utility Brushes

Utility Brushes

with brass or stainless steel bristles

Utility Brushes are available with brass bristles for soft materials or stainless steel bristles for tough materials. Keep a pair of these utility brushes at home and a pair in the workshop, too! Use the stainless steel bristle brush for tough jobs such as cleaning debris and rust from welds, threads, fittings, tools and corrosion from battery terminals. Use the brass bristles for such materials as leather clothing and shoes, golf clubs and plastics.

Flame Protector

Soldering Heat Shield

non-asbestos

Soldering Heat Shield is a 9" x 12" woven fiberglass heat shield that provides high heat resistance and protects work areas.

Product	Item Number	U.P.C. Number	Case Pack	Carton Wt. (Lbs.)
non-asbestos heat shield in hanging plastic bag	097050	078864 970500	5	2
in display pack	097050-D	078864 970500	5	2

Abrasive Pads and Sandcloth

Waterproof Abrasive Pads

reusable, maroon

Use **Waterproof Abrasive Pads** to remove oxidation, rust and scale from metal surfaces prior to painting; to clean pipe threads for application of thread compounds; to polish copper tubing; to rough up plastic pipe before cementing or to clean tools. Each pad measures 4" x 6-1/4" x 1/4".

5 pads in plastic bag	095002	078864 950021	10 bags	2
-----------------------	--------	----------------------	---------	---

E-Z Clean Abrasive Sandcloth

aluminum oxide, water resistant, 120 grit

E-Z Clean Abrasive Sandcloth is a flexible yet strong cotton fabric combined with a tough, hard aluminum oxide abrasive—120 grit to provide faster cleaning. Two layers of a special adhesive and water resistant resin make a plumber's roll that provides consistently stronger solder joints.

1-1/2" x 2 yards in hang tab box in display pack	095005 095005-D	078864 950052 078864 950052	12 12	2 2
1-1/2" x 10 yards in box in corrugated display	095105 095105-D	078864 951059 078864 951059	24 24	14 14

Wet-Cut Abrasive Sandcloth

100% waterproof, 120 grit

Wet-Cut Abrasive Sandcloth is ideal for deburring, cleaning and polishing plumbing parts exposed to water. This plumber's roll features an epoxy acrylic bonding system with special backing that is 100% impervious to deterioration caused by water, cutting oils, grease and chemicals.

1-1/2" x 10 yards in box	095405	078864 954050	24	13
1-1/2" x 25 yards in box	095505	078864 955057	12	15

Open Mesh Abrasive Sandcloth

premium grade, 100% waterproof, 180 grit

Open Mesh Abrasive Sandcloth is our best grade for cleaning and preparing copper tubing and fittings for soldering. It is fully waterproof; 180 grit gives smooth finish. Open mesh combines open nylon fabric with phenolic resin adhesive and aluminum oxide to give a sharp cutting plumber's roll. If cloth becomes loaded with metal filings, simply rinse in water or tap on hard surface. Can be used on both sides...lasts twice as long!

Soldering Paste and Flux

Liquid Soldering Flux —NSF listed for use on potable water systems

Liquid Soldering Flux is formulated with a strong cleaning agent to ensure a fast and effective soldering operation.

4 fl. oz. (1/4 pint) in plastic squirt bottle	097550	078864 975505	12	 Certified to NSF/ANSI 61
---	--------	----------------------	----	---

Soldering Paste —NSF listed for use on potable water systems lead-free

Soldering Paste cleans, fluxes and protects most metals such as copper, brass, steel and other easy-to-solder coated metals for potable water supply lines when used with lead-free solders.

1.7 fl. oz. tin in 12-pack display	097205-12	078864 972054	12	2
four 12-pack displays	097205-48	078864 972054	48	9

Water Soluble Paste/Flux —NSF listed for use on potable water systems safe, clinging, rinsable paste cleans, fluxes, protects

Water Soluble Paste/Flux is 100% petroleum free and is formulated with biodegradable chemicals in a nonhazardous base for use with all potable water systems. Safe for use on brass.

8 fl. oz. (1/2 pint) in plastic jar	097580	078864 975802	12	8
-------------------------------------	--------	----------------------	----	---

Flux & Solder Combination

for sweat fittings or soldering or tinning of copper, brass, steel, iron and coated metals

Paste form allows one-step fluxing, tinning and solder for general repairs. 40% higher shear strength and withstands working pressures up to 3 times greater than 50/50 tin/lead solder. One pound equals 3 to 4 pounds of wire solder plus flux. For use where expansion and contraction or vibration may occur. Not for use on potable water lines.

50/50 Flux & Solder replaces wire solder plus flux. Fluxes, tins and solders in one step.

50/50 solder flux, 4 oz. (1/4 pint) net wt. jar	097655	078864 976557	12	4
---	--------	----------------------	----	---

Tinning Flux

in paste form, lead-free

Tinning Flux is a lead-free paste that cleans, tins and fluxes in one step. It contains 8% silver lead-free solder. Safe for potable water systems when used with lead-free solder.

Product	Item Number	U.P.C. Number	Case Pack	Carton Wt. (Lbs.)
