

Virginia

Dual Purpose Vacuum Pump Oil

Virginia dual purpose vacuum pump oil has been specially formulated to seal and lubricate vacuum pumps and act as well as a highly effective flushing agent.

Virginia dual purpose vacuum pump oil with its unique combination of additives gives a greater lubrication, and leaves a film which will protect pumps from rust and corrosion.

These additives not only prevent, but actually remove sludge that may have formed before the use of Virginia vacuum pump oil.

What's in it for you?

- Lower vapor pressure
- Powerful anti-sludge
- Prevents rust and corrosion

Product Name	Part Number	Volume (Litre)
L340	475353	0.95
L341	475354	3.8

Suniso

Mineral Refrigeration Oils

SUNISO is the premium lubricant for Refrigeration and A/C application for over 40 years, this due to the long trouble-free service records of systems that have used Suniso refrigeration Oils.

What's in it for you?

- SUNISO 3GS-1G is Copeland approved
- Low floc point.
- Low Paraffin wax content minimises the potential for wax separation when used in low temperature applications
- Low pour point prevents oil from congealing in refrigerant lines
- Controlled viscosity. SUNISO maintains high film strength even when diluted with refrigerant, yet remains fluid under extreme low temperature operating conditions
- High dielectric strength allows the oil/refrigerant mixture to serve as an insulator between the motor windings and the body in a compressor.

Viscosity	Product Name	Part Number	Volume (Litre)
150 SUS (ISO 32)	Suniso 3GS-1G/5G	475328 / 475334	3.8/19
300 SUS (ISO 68)	Suniso 4GS-1G/5G	475330 / 475336	3.8/19
500 SUS (ISO 100)	Suniso 5GS-1G/5G	475332 / 475338	3.8/19
